SUMMARY

Talented full stack web developer, with huge potential and experience in creating front end applications using react.js and backend restfull api servers using express.js.

EDUCATION

Piraeus University of Applied Sciences
Bachelor in Automation Engineering 2015

SKILLS

React.js, Javascript, Express.js, PostgreSQL, Node.js, Redux, Continuous Integration, Git, CSS (SCSS), HTML5, Apollo Graphql, Prisma

EMPLOYMENT

Freelance, *Full Stack developer*   May 2018 - Current
- Built several projects from scratch implementing engaging user interfaces and using best practices in order to make the apps fast.
- Developed UI components using React.js and made them responsive using media queries.
- Integrated front end React apps with back end apis.
- Wrote front end code using React, CSS3 and HTML5 with a focus in performance optimization.
- Wrote back end restful api servers using node.js and express.js, using hashing algorithms to secure passwords, creating a Postgresql database.
- Deployed the front end on Github and the back end on Heroku.
- Utilized front end: ES6, HTML5. CSS3, React.js, Circle CI
- Utilized back end: Node.js, Express.js, bcrypt, PostgreSQL, Heroku

PROJECTS

News searching app   Mar. 2019 - Current
An application that shows information about articles from different news websites and gives you the ability to apply filters and search function. Utilizes React.js, Material-UI, Apollo client, Yoga graphql server, Prisma API, PostgreSQL, Node,js.
